The Hawkins Clock Company Ltd

At Hawkins Clocks, we provide a complete design, build, installation and backup service second to none, combining the benefits of age-old craftsmanship with the advances of modern technology. A clock is a notable feature, which enhances the appearance and value of a building and its surroundings. Clocks are ideal focal points, and draw peoples' attention to buildings that might otherwise go unnoticed.

Put a Hawkins Clock on your building and enjoy the quality and imposing beauty.

Hawkins Clock Company has taken every care to verify the information in this pricelist. The VAT rate quoted in this pricelist is 15%. Our prices represent excellent value and our normal delivery date of 4-6 weeks is something we pride ourselves on achieving and often bettering.

Most of our products are either made in house or within the UK. However some products are sourced worldwide and like raw materials have proved very volatile in price. Therefore Hawkins Clocks reserves the right to alter prices where necessary.

Carriage prices have also been very difficult to predict. The prices quoted for packaging and carriage are based on UK mainland destinations to most areas. If the carriage can be consolidated or even reduced because of favorable prices we will pass the saving on or alternatively we are happy for you to arrange your own collection. Highlands and Islands along with foreign destinations must be by individual quotation.
